

Notice "Unlimited" text displayed for each of the board plans. This is because we need to change the default view.

Click on one of the board plans (Weekly 10 Plus in this example).

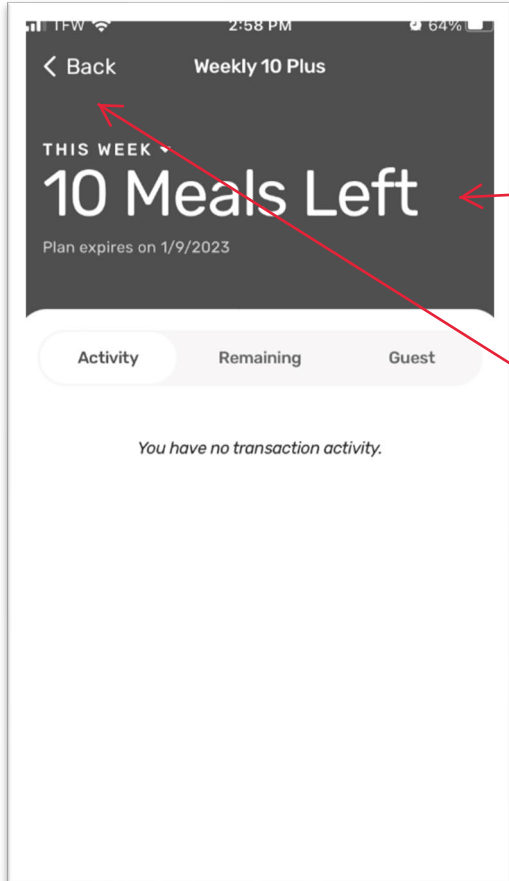

Because this is a weekly plan (10 meals/week), we need to change the view from "This Year" to "This Week." Click on the "This Year" button for a drop-down list of options.

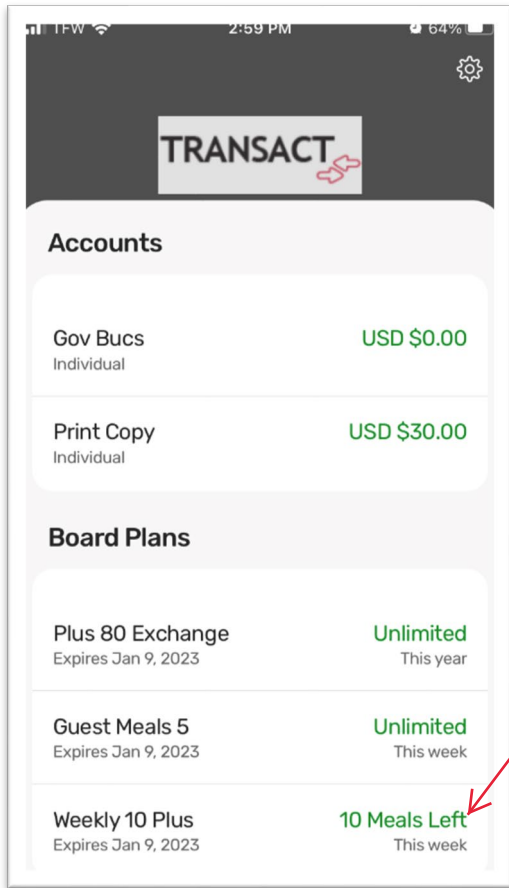

For weekly plans, select "Show This Week."

For other plans with semester limits (Plus Exchange, Block, Guest Meals) you will select the "Show Semester/Quarter" option.

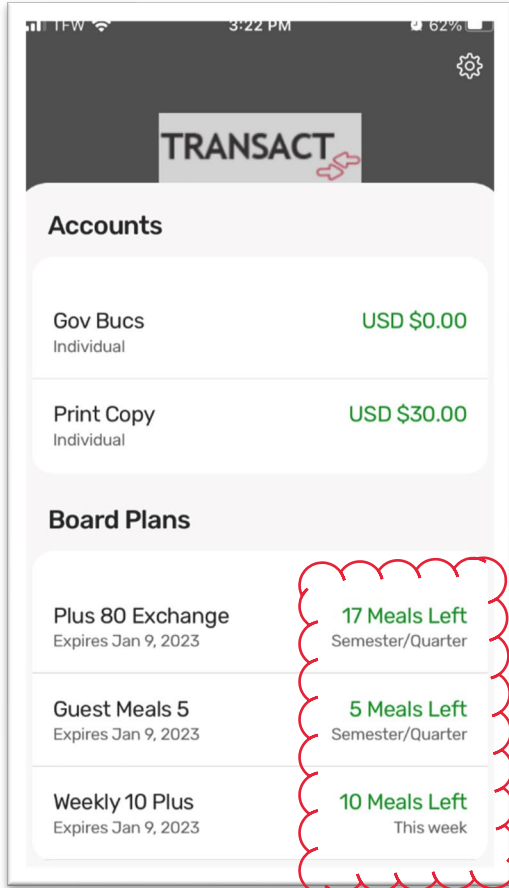

Notice you will now see a more descriptive display of how many meals, exchanges, and guest meals you have left.

Click on the "Back" button to go back to the main screen and verify your changes.

Notice you can now see a more useful description of how many meals you have left.

Complete the same steps above for the remaining board plans. Remember, for semester plans like Block, Plus 80/100 Exchange, and Guest Meals, you will use the "Show Semester/Quarter" option.

Notice board plans no longer show the vague "Unlimited" descriptor.
