SmarterMeasure Assessment Scales and Sub-scales

The SmarterMeasure Learning Readiness Indicator is comprised of eight sections referred to as scales, and each scale has several sub-scales. These scales are internal and external factors and skill sets that contribute to success.

- External factors like life factors affect the student outside of themselves.
- Internal factors like individual attributes and learning styles help describe student traits.
- Skill sets are those essential to navigating and performing in self-directed learning. SmarterMeasure assesses skills in reading, typing, learning management systems and technology in general.

Scales	Sub-Scales
Life Factors	<ul style="list-style-type: none"> • Availability of time and a dedicated place to study • Reason for continuing one's education • Support resources from family, friends, and employers • Perception of academic skills
